OUR HISTORY

Few brands can match the racing heritage of Ford Motor Company. Whether competing in single-seaters or stockcars, the famous blue oval emblem carries a rich history of innovation and success. Ford Racing, the brand's high-performance arm, oversees the development of Ford racing engines and vehicles competing in series such as NASCAR, IMSA, SRO British GT, FIA World Rally Championship, Supercars Championship and Formula Drift. Ford Racing will also spearhead the much-anticipated return to Formula One competition with Red Bull Ford Powertrains from 2026.

Perhaps the most famous name in Ford's racing armory is the Mustang, a model that has enjoyed huge success in racing over the decades. That fine tradition continues in the modern era with the new Mustang Dark Horse R, offering the most demanding track enthusiasts a turn-key race car ready to compete in the all-new, single-make Mustang Cup series, sanctioned by the United States Auto Club (USAC).

THE SERIES

MUSTANG CUP

SPORTS CAR PYRAMID

Ford Racing has created a pathway for Mustang enthusiasts (and established drivers) to reach the upper echelons of global sports car racing:

5. The pinnacle of sports car racing, the track-built Mustang GT3 features more power, more aero, more adjustable components and less overall weight. This is a V8 beast like no other and the car you will see competing in the 24 Hours at Daytona and 24 Hours of Le Mans.

GT3

4. The Mustang GT4 is a step up from the Dark Horse R, with an increased number of racing-specific components competing against a field of other OEMs and hungry drivers vying to progress their careers.

GT4

3. The Mustang Challenge is the natural progression for drivers competing in the Mustang Cup (or the already seasoned racer) as it provides close, competitive racing in front of large crowds and streamed to a global audience. Series champions can accept a cash prize or a test in a Mustang GT4 car.

MUSTANG CHALLENGE

2. From there, a driver can enter the cost-effective Mustang Cup USA and develop their race craft within a field of Mustang Dark Horse Rs.

MUSTANG CUP

1. Starting in a Mustang Dark Horse at a Ford Racing driving experience, budding drivers are taught the fundamental techniques to drive a performance vehicle on the limit, within a safe environment.

FORD RACING DRIVING EXPERIENCES

DRIVER DEVELOPMENT TEAM

The Ford Racing Driver Development Team is an exciting initiative designed to discover and nurture the future stars of sports car racing. This dynamic program identifies promising young drivers and equips them with the tools and support they need to unlock their potential and continue their progression through the Ford Racing sports car pyramid.

“At Ford Racing, we are always on the lookout for fresh racing talent. This program is all about creating opportunities for the next generation of Mustang racers. We want to give these drivers the tools and support they need to reach their full potential, and we’re excited to see what they can achieve.”

- Mark Rushbrook, Global Director, Ford Racing Motorsport

PARTICIPANTS WILL BE EVALUATED BASED ON:

- Performance in Ford series such as Mustang Cup, Mustang Challenge, and Mustang GT4 globally
- Driver stats
- On-track improvement
- Feedback from industry bodies

DRIVERS SELECTED FOR THE PROGRAM WILL RECEIVE SUPPORT IN THE FORM OF:

- Expert mentoring from factory Mustang GT3 drivers
- Hands-on coaching during select race weekends
- Access to simulator sessions supported by Ford Racing engineers
- Physical and mental conditioning required for racing
- Sponsorship and social media strategies to navigate a professional motorsport career

The 2025 class consisted of Marco Signoretti (Canada), Erik Evans (USA), Nathan Vanspringel (Belgium), Robert Noaker (USA), Sam Paley (USA), and Jenson Altzman (USA).

The ultimate goal is to develop these young racers into future factory drivers—the pinnacle of Ford Racing.

SERIES OVERVIEW

Unique to Mustang Cup is the option of an optional two-driver format. Each race in a doubleheader format will count towards separate championships – the Miles Cup and Parnelli Cup – allowing two drivers to pursue separate championships or one driver to compete in both.

Drivers with a current club racing license from accredited sanctioning bodies will be recognized and issued a USAC Mustang Cup license. Drivers without a racing license, but who have track experience and wish to race in Mustang Cup, may obtain a nationally recognized club racing license from a number of accredited racing schools, in order to receive an equivalent USAC Mustang Cup license.

Mustang Cup offers flexibility to meet any racer's goals, whether aiming for advancement to a national championship series or competing at a regional level.
